

[gridView] bigDecimal API 사용법

- 본 샘플은 웹스퀘어5 SP4 버전에 최적화되어 있습니다

1. websquare/config.xml에 다음 내용 추가

```
<engine>
  <module src="/websquare/externalJS/big/big.min.js"/>
</engine>
```

2. 예제 : gridView_footer_sum.xml
샘플 우측 그리드뷰에 expression 참고

```
scwin.userExpCol = function(colID) {
var colArr = dataList4.getColData(colID);
var bigObjNumber = WebSquare.bigDecimal("0");

for(var i=0;i<colArr.length;i++) {
var colDataStr = colArr[i];
bigObjNumber = bigObjNumber.plus(WebSquare.bigDecimal(colDataStr));
}

return bigObjNumber;
};
```

```
<w2:footer id="footer9" style="">
<w2:row id="row10" style="">
<w2:column id="column212" expression="scwin.userExpCol('col1')" blockSelect="false"
style="height:20px" width="141" inputType="expression" displayMode="label"></w2:column>
<w2:column id="column211" expression="scwin.userExpCol('col2')" blockSelect="false"
style="height:20px" width="141" inputType="expression" displayMode="label"></w2:column>
</w2:row>
</w2:footer>
```
